Created in three parts UI, backend and integration of code.

Need to have Vscode, MongoDb,react,Node Js

Frontend
npx create-react-app login
Cd login
Npm start

Backend
Npm init
node index.js

Installation

npm install bcrypt : simple password into hash by salt
npm i axios : API service
npm i google-maps-react
npm install express mongoose
npm list react-router-dom

Flow of code:

Index.js
App.js
Components
1. Homepage
2. Login
3. Register

Backend
Index.js
- Express
- MongoDb
- Routes
